System Objectives

1. Purpose

The purpose of this document is to define the main objectives of the electronic patient information system used by the fictional private hospital in Jordan.

2. System Objectives

2.1 Confidentiality

To ensure that **patient information** and **medical records** are **accessible** only to **authorized users**.

2.2 Integrity

To **ensure** that **patient information** and **medical records** remain **accurate** and are protected against unauthorized modification or deletion.

2.3 Availability

To ensure that the **electronic system** and patient **records** are accessible to **authorized** users **when needed**.

3. Application

These **objectives** apply to the **electronic system** within the defined **project scope,** including patient information, medical records, appointments, user accounts, and access permissions.
